## **DETAILED ACTION**

### ***Response to Arguments***

1. In view of the Appeal Brief filed on December 08, 2003, PROSECUTION IS HEREBY REOPENED. A new rejection with new prior art is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reese (US 6,236,980).

Art Unit: 3624

Reese discloses, as in claims 1-46, an automated trading system for use in an electronic exchange system network, comprising:

a receiver interface (102, 116) that receives market price information for a first traded item from an exchange (see figs. 1 & 2, col. 7, ll. 42+; col. 18, ll. 50+)

data reference logic that outputs a transaction value for the first traded item from a data structure based on price information for a second traded item related to the first traded item (see col. 10, ll. 64+);

decision logic using at least a portion of the received market price information and the transaction value to generate a decision whether to submit an order for the first traded item (see col. 1, ll. 7+); and

an output interface for outputting a request for market transaction for one of the first traded item and the second traded item for transmission to the exchange in response to said decision logic (see col. 10, ll. 64+).
